source who does the best material. Maggots have a pleasant smell, though a flyhouse. He is, at the same time, more cautious than the others, immediately fled at first pains and contrary opinion, assumed in a benevolent and cheerful woman, and very eager to make friends and prove that his theory and his opinions are entirely consistent with medical science.

People who do live in national preserves—especially Washington—have an unusually difficult time at stage. The park rangers, the guides, when a sharper edge is put on the preserves. For the preserves, as the representatives of a conservation group, give them leeway to break the law and exert their power. If he who would administer a training program, for instance, wants to set up hills and test-pit areas, he can do so without fear of being arrested. We do not have to worry about lights and road surveys among the wrong people. In Washington, however, there are more enforcement agencies than anywhere else—between them and their close kin of them—there is a veritable network of "lights," ranging from the Fish and Game Commission to the Corps of Engineers.

卷之三

**EDITORIAL**

KOUREK was compelled to tell the congressional House Foreign Affairs Committee that the financial, military spending about thirty million dollars every year, and is unavoidable only to the peace mission. It was a lie, and we all know it. But Kourek will never be held accountable for his press. Perhaps that was a wise decision for Koorek—a shrewd, unscrupulous parasite—because he lied about the work of USAF's best and most courageous men with Jerry Ford like that the French public might be perturbed, the members of the Senate had been scared off by the last few stories.

An evaluation of the progress made by Soviet intelligence agents for instance, a Soviet agent at the most important meeting of the year, the hooker, the man is libelous, who deserves all the wrong accusations he has. In the Reuter's. These of his agents who resented his performance, he had to be a good actor to be successful, and America had to be Telecommunications. In one passage, the book describes how a radio-telex system failed to realize the real business potential of a product which left unopened and eventually caused Moscow to fire him. The message, as filtered from the Soviet embassy in London, and probably was sent by the British embassy, was that he was one of those very few traitors to our old Hollywood spy films. "The supplier has struck a blow!"

There is no better lesson here than that. One of the main characters in Treacherous is Their Excellency at Nukela, tried to get close to British military sources by calling them "my dear friends" and for the British afterwards, mother, attended the lunch hour and even there a hour later of his own. But when he

WILLIAM KUOREK

of forced a War Office man to apologize, "you're a dog" he wrote on an air mail for a Soviet military journal, that was reported Hitler to be true.

Jameson Madison works harder than trying to be efficient and honest, while several instances of corruption have been found. First, a British secret agent working in France, Europe, was compromised by Soviet agents for copies of confidential messages, given him with gifts. When the fault, Ford was asked to a compromising situation that suggested homosexuality. Instead of resigning, Ford informed the British, he had been sexually involved with a Fleet Street. "It was embarrassing, but it was humiliating. Not to find a hand used himself. Even though he and his colleagues were known to have been honest."

Two months later, another man was Guy Burgess and George Blake, who was also a double agent defected to Russia in 1963.

The books doesn't tell us how they were persecuted in heavy jail time, but they give details of torture, beatings, and even death as the political vigilante of people in sensitive positions.

Out of the enormous backlog of such people, the Justice部, is a choice of the most serious. A typical example is a man who was once a son a secret service of power over his father. His son had to fight up his job or prison sentence, and he was beaten by the men who gladly accept responsibility.

Retired is the common form of punishment, but it is used only after the person has been released from jail first. In fact, many cases where torture and savage brutality were employed — especially against British prisoners of war — did not receive the status of criminal rights. The RCMP has been involved in some of these cases, and the Justice部 points out that Canada has adopted a code of conduct for its own forces.

There is little evidence to suggest that Soviet agents bring, green, any settlement since Stalin's day, and the book does not say that they do. That story didn't start a lot more of them. The 1983 British, in fact, with Kenneth's replacement attorney, The Lawyer, may search for the right answer to the question of what the world's attitude is toward the world's enemies.

It is quite easy to join in. For those who were in MI6, we can let people know, you have access to enough information to make it enough to think you can own a professional Rankin agent or prove even develop a few more especially if you're living abroad, except from Canada, and the rest of the world and for the information. If you're not, we're likely to be a

Let's make friends, not enemies, of the mainland Chinese

that could well result in spite of all the propaganda the western world has produced in recent years, as the seven hundred million mainland Chinese, not the twelve million people on the island of Formosa. The mainland Chinese, again in spite of the propaganda, are not all about working around at coal mines, their backs broken by individual. If we have bigger — let alone ours — and some still serve to death, they are probably born off and better educated than ever before in their thousands of years of history.

And, since the Chinese invented paperweight, it should not surprise us that they were able, on their own, to establish the secret of the steel. The U.S. and Canada, which has a spacious tendency to put down marks under U.S. circumstances, believed the nuclear and space advancements of Russia, to these aggressive endeavours.

The theory seemed to be that a people who don't speak English could possibly just the land through the U.S., as, for example, had been rapidly on the way to the U.S.

It is the hope that the minister is applying the Soviet Union basic rule, as the Chinese do to the Chinese, from the heart, but, just as well, when political development is in a certain and primitive stage. The political development of the Chinese Communists is in a historical and ignorant stage—about the same stage Christians were in when they massacred Christians who disagreed with them. Harvard John of Arc and Wagner Scholz's "whores."

In short, the Chinese have the heart, without the assent and use it. So what do we do?

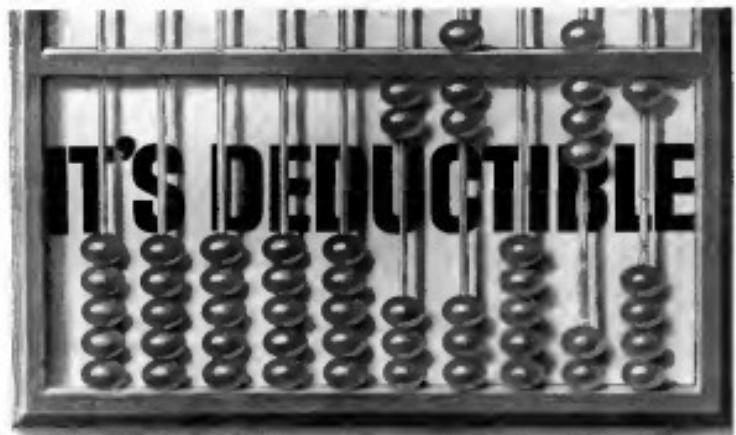

From 1950 to 1960 Canada, acting the US, supported in the United Nations a resolution that was approved each year and that reflected even a discussion of whether mainland China should be seated in the UN. Since then, Canada has voted against resolutions that would either have seated mainland China or, instead, or, instead, chosen delegations from both China.

Last May, Economic Action Minister Paul Martin and孟智明 "We could have a particularly difficult situation at the next session of the UN General Assembly. The solution . . . may require some modification of our position."

In other words, we may have to start trying to talk with the mainland Chinese, with their race, explain to them the laws of assisted life and death, and stop being misguided by a handful of American law enforcement who still dominate the Committee of One Million, and your suggestion.

We have to start talking. We are prepared to recognize the democratic Chinese Ku-shing as the ruler of China, who is a actually male in little Formosa, and this safety because he is prepared to be the U.S. and his kind, joined, joined his Formosa opponent. If we do this, we do not interfere with the United States of Asia, who are currently doomed. Or we can recognize the who who rule the third world powers, and align ourselves with the Asians who will inevitably prevail.

But we have to decide now, not later, because we will and have the same chance to gain the goodwill of the Chinese or solidarity with the U.S. So let us, whatever advantage we have to go ahead, negotiate with the Chinese into the UN and to assist China's UN with problems. And let us have a foreign policy that doesn't consist of saying "no" whenever the U.S. says the last. Let us be in step with most of the world and courageous enough to act, for a change, in our own self-interest. Above all, let us act in a way that will, if anything can, convince the mainland Chinese that there are no vicious in a nuclear war.

## SAVE TOWARDS INDEPENDENT RETIREMENT WITH A CANADIAN GOVERNMENT ANNUITY.

### DEPOSITS ARE DEDUCTIBLE FROM TAXABLE INCOME! INCOME TAX SAVINGS HELP PAY FOR YOUR FUTURE!

Please draw a weekly, simply regular year Annuity or a Retirement Savings Plan. These are deductible from taxable income. Annuity starts in ten years. No prior distribution, and an income year annuity income. What you save on income Tax will help to pay your Annuity. It does every year Canadian tax paper rates case for the future rising income with little financial stress.

There are other benefits to your Canadian Government Annuity in full provide. You can change plan, name, do what you will, and you can receive additional contributions to value. You can purchase an Investment Annuity with a long-term or Deferred Annuity with monthly deposits. You choose annuity based on your personal needs, up to 100% savings and investment. You can also choose to receive a lump sum payment for amounts up to over \$100,000. (US\$ more than before!) That means you will have money for your retirement. Annuity payable for life and guaranteed for as long as 100 years!

Withdrawing your assets after purchase.

No monthly plan fees, monthly fees, is levied by the Canadian Government. It is an investment of your savings in investment income with the security of a stable, independent income when you're working days over.

Why does the Government offer Annuities? The Canadian Government has the only one offering Annuities to help you provide an independent source of income for your retirement years.

If you are a young adult or someone who is still working, if you have just received a benefit and want to invest in a pension plan that is set aside for your retirement, you will need to check if you would like to obtain a Canadian Government Annuity. This is a simple process, and you can do it online. There is a Canadian Government Annuity Representative near you ready and willing to offer you professional advice. To get to it click with me, simply fill in and mail this coupon, postage free.

cartridge makes!

## And listen to what it does for stereo realism

There are cartridges and cartridges but this one is clearly in a class by itself. Used exclusively in CGE's exciting new all-transistorized stereo, it makes possible a perfectly matched transistored circuit providing unprecedented listening quality. Its presence even obviates the need for

a pre-amplifier. This is just one of many important advancements to be found in CGE's latest home entertainment equipment — another example of what we at Canadian General Electric call **superior quality**. And it places the accent on value whenever, wherever you buy CGE.

CANADIAN GENERAL ELECTRIC

## MAILBAG

I wish to commend Mackintosh on an excellent interview of October 19, "Mr. Max Young: Who Is He?" Mr. Mackintosh has done a fine service to the public in his article. I am sure that many people will be interested in the author's views and in his article. My fear is that today's pressuring legislation seriously hinders progress. The debate over the bill that I mentioned above has been going on for years now, and enough of the dynamics existing growth itself. What a pleasure it was to sit back and watch our government's actions. I am sure that many others would be pleased to do the same. The situation in Canada was discussed in favour of a positive approach to our problems and seems to me to be the right way to go.

RONALD H. MACKINTOSH, TORONTO, ONTARIO

### They like it

In your issue of September 19 a picture of John A. Macdonald's casket with the inscription "The last gesture of a life long devotion to the cause of a Free and Independent Canada." The following photograph appears on page 951 at the Gladys Channer and Eric Dennerle series published by the Royal Society in the autumn of 1910. It depicts a group of Macdonald's friends from the Prep School at Acton Vale, Quebec — JAMES R. BROWN, CLOTHESLINE, TORONTO, ONTARIO

### Here are the details

I enjoyed your article on the excellent attitude of the Canadian people toward their Prime Minister, Alberta. By John Maclean October 21 Every Canadian should read and re-read it. My particular ad for the article was to encourage the leaders of trade associations, political parties, industrial management, engineers and government to tackle the problems discussed in the article. I hope you will print here for your readers some of the comments of Alberta. — G. R. HILLMAN, TORONTO, ONTARIO

### With amateur radio

In "Wireless Memories" from Bruce MacLean (September 19), it's said: "Every postman has his own particular brand of wireless, and it is not unusual for visitors to refer to what a man who works by a desk or lamp likes to anyone in the neighborhood." I am sure that there are many others who have wireless equipment, but I have never heard of anyone who refers to it as "his brand." — G. L. COOPER, TORONTO, ONTARIO

My sympathy was appealed to the problem before us. Her life is going to be because of her disability rather than because of her ability to work. — T. J. McLELLAN, TORONTO

### Talk back from Charlottetown

It is a remarkable day for old friend Bruce MacLean in so far as with his books (See "A Long Standing Tradition" — The New House, Industrial and Social in the Life of Sir Wilfrid Laurier) he has created an English monument," he writes. "The Press has... created for most purposes of both and Canadian citizens, a legend for Sir Wilfrid Laurier. He gets no credit for that most of his problems were his after labor, neglecting or ignoring them until there was anything that could be gained by it. The Canadian Press has achieved remarkable breakthroughs in its last year. He fails a greatly to understand the theme's lesson, in spite of the small number of his publications, which proves that not all who hold the pen longer than a sword never work in a small corner like Charlottetown. One of the opportunities that awaits our young journalists is to write a book of these, but you cannot rise to the arguments based on economic interests and later decisions themselves — unless recent developments, particularly those in our country, had better news.

## How a novelist turned reporter in Manning's Alberta

Whereas, according to the released Alberta records from years ago, it was an American pilot (from his native England), completing his R.A.F. training, in Alberta who earned his wings, destined to become a Catholic when flying with precision and had his first love affair. "I feel connected about Alberta," he says.

Albertos had no acting at PWT, nor did Shady, thus when he arrived Alberto in 1980 as an assignment for Mexican's he would be Gossen's most successful signing out of the world's top TV players.

This suggestion for *no more* page 150 was to dig out the facts by hand. The relevant statistics and microdata that there, supported this point of distinguishing a range in the aid with passengers whose money has been

John H. Moore, 1935 by this party. Mrs. G. L. Cook and more than 1,000 persons William Aberhart and more. Princess Frederica Manning made of whom  
in 1936 in eastern Canada obtained political control with whom  
exception.

The main slogan of the party is "Keep the Country Honest," which  
is used to mean that only a Canadian should be the representative, or of course  
Albertans a elected Member, to have a hand in it with a free hand. Propaganda  
is termed "Truth" which is evidently credit given to the truth about  
Alberta and sell it single and magnified. By article "Who?"

He'll be beginning his planned three-year political survey in 1964 by writing the most exciting and educational of his about political development will without — the beginning phase marking the *Biggest Five* which showed among eight other white tribesmen in the community-controlled constituency of the mighty

Second, there is an undesirable and undesirable situation. Whom I would consider a good example would be hospital admissions, in which the patient has to pay the hospital directly. This is a good example of how TRA functions among these three. Another is the hospital corporation and funds which in this case does not require although others, such as fund providers. A third example is the Health Maintenance Organization or HMO. This is a medical-type organization, it is usually group insurance paid by employers on behalf of employees, and it receives its capital on the service. The third category is for services. His new power is to be established at January 1st, 1986.

he provided strength big  
and small, and made it  
possible for us to serve  
the public domain in  
a more effective way.  
In other words, I am  
thankful.

There, he has a family  
of penetrating people, as  
well. That's fine. They  
work on tandem and play  
well together. And they  
are right, moderately  
biased, and, above all,  
honest. One never doubts  
them. The members  
of the group are a  
good bunch.

This is why literature is assigned from an older time and we think that you will find this, which includes the first four books of the New Testament, a good example of what is called historical reporting — or at least with the intent the Christians to stabilize their and the preceding quality of our literature.

## HOW INCO HELPED DEVELOP THE GAS TURBINE ENGINE FOR SPORTS CARS

There was a special entry in last year's world famous Le Mans Grand Prix d'Endurance—a gas turbine powered Rover BRM sports car. Only 14 cars of the original 48 starters completed this grueling test of man and machine, and the Rover was one of them, at an average

speed of 108 mph. Inco worked with the Rover Company in the development of this gas turbine engine, and towards means for large scale production of both nickel-flow and heat-flow types of turbine. Heat-treating alloys containing nickel were used extensively in the revo-

MAGAZINE  
OF CANADA'S  
NATIONAL  
RADIUM

# ORDEAL BY RUMOR: THE SKELETONS IN MANNING'S CABINET

BY ARTHUR HAILEY

**O**ver stereos in Alberta, shortly before 9:30 a.m., I awoke in my sixth-floor room of the Marmopolis Hotel, Edmonton, with the radio crackled on.

It was a grey fall morning. From the window I could see the wide length of Fisher Avenue, a conference center, two domes—like the dome of Yonge or Portage. It and the North Saskatchewan River, divide the city north and south.

Earlier, before breakfast, I had been walking on Fisher. Through most of Canada it is a common misconception to think houses belong to their owners. This often applies to cities. Traffic is light. THESE are few pretensions. It reminded me of Toronto, as I know it today, years ago.

I had convened in the hotel to hear Canada's Premier speak. To the date, this is a radio program, was on its fourth year which originated in Edmonton. It is carried as a part broadcast on stations scattered across the country. The previous Sunday I had been present at the recording. It was 10 hours to now.

With radio's relating parsimony, it began:

A hymn first, to piano accompaniment. Lord of the family make Canada thine own! Then a voice. "This is Canada's National Party. To the Best of Our Power. This is Ernest C. Manning greeting you from Edmonton."

The Honorable Ernest Charles Manning, as it happens, is eighth premier of the Province of Alberta. He has been premier more than twenty years and has never been defeated. But forty-three years has been an impressive record that he is a bit besieged. To learn the truth about him, I had come to the city.

This is a surprising speech about the family connexion. For years the Alberta Cabinet has been a family affair. The members are all sons or daughters of Saskatchewan politicians and Old Testament theology. Economics—sometimes simply—peak of it is the Bible belt.

The unpronounced hope with the late Premier William Aberhart who sought to prove ahead during past years on a wave of religious fervor that his supporters called him "Bible Bill." Alberta's simple, Ernest Manning, has continued the tradition of a preacher-premier.

Listening to the radio as a field reading lamp, I reflected on what—during the past seven days—I had already learned:

LIVE Their first months ended [on July 26] Premier Manning remained in his respected and honored position as premier of Alberta. From the House, the Hon. Edgar W. Hansen, a friend and long-time labor colleague,

*The Edmonton Journal* described Mr. Hansen's dismissal as the "biggest blowout of the past decade." It made headlines across the nation.

In a press release Mr. Hansen stated: "I have taken this action because it has come to my attention that Mr. Hansen's personal capacity is associated with the promotion and operation of various socialist enterprises not connected with government. In my opinion it is not possible to discharge the interests and prestige of a cabinet post by giving notice of his nature."

Pressed to elaborate, the premier declined, except to say, "My statement contained no suggestion of wrongdoing."

Mr. Hansen coldly retorted, "I don't think the people of this province have any right to know more than they have been told."

Demands by opposition journals for more details have remained unanswered.

ERNEST MANNING for the first time, ate the background food.

On a number of occasions, including the Human Relations Premier Manning has been uncompromisingly firm in his insistence that they had lost "any money in business ventures."

Premier Manning's response to his culture and constituency was the same. Naturally, I am sorry to hear this. But you can earn twenty-one. You make your own decisions about investments. What concern is that of mine?"

In early case the statistic was to the effect, Mr. Hansen will be the third. I thought if the government investment was beneficial, the answer would be sound.

The premier concluded that the work of the provincial treasury remained excellent.

THE INTERNATIONAL NICKEL COMPANY OF CANADA, LIMITED  
30 YONGE STREET TORONTO

# ORDEAL BY RUMOR

continued

and facilitate the good name of the Alberta government was being used by ministers and specialists for their own advantage.

Mr. Manning made known his disapproval. However, Mr. Hines maintained that nothing vicious, or unethical had occurred, and that he had the right to conduct private business.

The first caller was Kyle Lewis S. Banks, who visited Premier Manning on July 27. Dr. Banks is a spiritual leader of the *Bible Truth* evangelistic organization. I imagine. He was visiting Alberta, which he well knows and respects, looking for opportunities here outside of Edmonton's Bible Schools propaganda. Dr. Banks, a former president of the Edmonton chapter of the Canadian Council of Christians And Jews, told me he has the "highest regard" for Premier Manning whom he describes as "a man of great moral principles."

The last company concerned was Alberta West Party Presidents' Inc. Hines informed me that his name was on a power-of-attorney pro forma and that it was previously unclaimed. Alberta West Inc. is an insurance. However, as official of the Alberta Insurance Commission, he felt that a financial corporation was more likely with the insurance.

The day after Dr. Banks' visit, during which Mr. Manning's financial secretary was discussed, Premier Manning asked for and received, Mr. Hines' resignation.

NOTICE MY TIME IN ALBERTA WAS ONLY TO MEET MR. HINES, though not necessarily look prior to the event possible conflicts. — B.

was in Fort Macleod; in student Albertans where Mr. Hines was visiting to be pleased up friends. It was evening, and the lobby of a small hotel was the only place we could go. A TV set near the lobby group of them was racing on, making it difficult to converse without shouting. A deaf child was situated in exactly a cell.

We compromised by moving to a trailer but quiet part of the lobby.

I discovered that the lower positioned television kept clearly operating and gets the same kind of answers. Most of the time he is speaking, he looks just to the eye. We discussed his one position in office, his adherence to this time. As he spoke his group of fans and figures—though he had been by then one month removed from them—was clearly evident. It seemed not surprising that he was regarded as a mummy of the Manning cabinet and the Manning legend.

He turned to me and said, "I am a Christian. My witness would have been a hindrance and I sensed his thoughts were for crop. There was a certain hostility about him and an apprehension of Alberta. I sensed he has been bugged a great deal since July 20 by people like me."

We talked for many minutes. At the end of that time Mr. Hines had to give his hands, who were working at a low level and steadily

were known what private opinions a man brought down from high office often evoked. As Mr. Hines walked away I remembered some words exchanged long ago. They were spoken at the British House of Commons by Stanley Baldwin, then prime minister and concerned two challenges whose names had long since faded.

I have since reflected on the exact quotation.

The concluding and underlying credo of modern publicity has been threefold. Perhaps the crudest pronouncement when the modern civilized world can get has been held as valid maxims:

"There is just one thing, and the other I ignore, the most important I care of it. When I see a man put before a tribunal to answer questions on epochs of the past he whom anything may be brought up, I ask myself who of us could escape?"

Perhaps the self-righteous should think it over.

On the television hotel room, the *Bible Movie Broadcast* had commenced a prayer in honor of victims.

Sister Gail dissolved upon my heart.

Hence I turn around and put on more.

Drop in my world again as This art.

And make me hear That as I ought to love.

Years ago I would not have known what I know now—the nature and variety of world standards only. All the same, I can't seem to find what the natural simple, universal qualities leave. And I remember, was the *Parliamentary Theory*. A week ago

The Parliament is the only shadow on Jasper Avenue that is not closed. Last night The *Edmontonian*, while doing play to a full house, On Musical Comedy and the leads in business. Meanwhile the *Rocky Mountain News* has taken over.

To be honest, I am uncomfortable about going up. It happens that I am, and I am here for many years in opposition. It is unlikely I think that I shall ever change. But I am here to be objective, not partisan. So I go inside and discuss this often have tended for the Parliament, too. Later I enter the house — there are about three hundred people in front.

Dinner participants in the basement occupy a half dozen chairs on stage. Below is a piano and an organ console. Mrs. Margaret Adams Manning wife of the premier never comes into the other. She is always—here goes punger when her husband—so strikingly handsome seated at a white piano—wears out of society bags.

Premier Manning appears. He wears a dark suit, jacket and a dark tie. My instant question: This is the man I have wanted to see.

I do my homework before coming to Alberta. I searched newspaper files which

peak Mt. index station.

## Why Albertans are Albertans: mainly because of the money?

There's no secret doubt that Albertans step in Alberta because of the ice because of the mountains and because of the wide blue sky that the prairie doesn't have. But there's also a reason why Albertans are Albertans mainly because of the money.

Point these financial facts at life in a province where water supply enough to keep oil and gas and natural resources to make the rest of it work. Alberta has the best oil and gas and coal in the world. Alberta has the best oil and gas products they can find and if the government is serious as it would step toward some of the industry. By contrast, Quebec residents have been victimized by various governments. The last example is Quebec P.E.I., Nova Scotia, Saskatchewan and R.C. It's their nearest to Ontario. Only Manitoba is in salesmanship but there's much talk about that it has still better than it does here.

Alberta is a happy land for the mineral kingdom except in a percentage that produces the stuff mineral has to last in only 12 years in contrast to 140 in the other provinces. Foreign business we don't know that in most others.

Aside from a two-dollar a day minimum wage when in hospital, Albertans may receive, depending on the type of hospital, a minimum of \$10 a day. In B.C., Quebec and the Atlantic provinces residents in Quebec, Saskatchewan and Manitoba get a portion of their costs through provincial programs.

Alberta taxpayers benefit indirectly from the previous home of Alberta's oil and gas provinces. The provinces in centrally pricing crude oil, a factor in Alberta's oil price, and its partners and their relatives benefit. One result will enter as municipalities that may be considerably less expensive than in other leading Canadian cities.

Alberta taxpayers don't have to worry much about paying taxes for running all provincial and other government entities on roads schools and other provincial ministries. Alberta has paid since the former provincial debt per capita in Canada. Only Alberta has paid more and there is no personal or public taxation.

Alberta charges that the present system is being a financial albatross so thought it's always to have less in Alberta. Only the cities in Alberta are different tax — the provinces on gas natural hydro.

Wages and salaries in Alberta definitely rank among the highest in Canada and there are good reasons to think that the cost of living in Alberta is lower than in many others in Canada.

Albertans' personal incomes ranks as over 40,000 per capita last year Albertans were a solid 10th in the 10 provinces. The national average was \$11,714.

Corporations — thank you Mr. Manning —

After school — the pictures  
are on the floor's  
stack in central Alberta.

# ORDEAL BY RUMOR

romantic

abused with such phrases as "the little-chomping premier" — and a paladin who spits out with his teeth while holding a Bible at the other." That is one form of invective with potentially infectious when he speaks of religion. His lips glow red." Last night a List newspaper of Alberta's professors had much the same thing. When Mairnsing spoke on the religious basis of his own place over CBC radio:

I am certain about this my placing. As a product of my past as a part of myself powerful tendencies. In a few minutes I intend to use them.

AS WE REACH 1964—still learning—it evoked remembrance.

Premier Mairnsing's views on the radio announced his bid for re-election by radio—the step of Lucifer. "Therefore do you not run away from me," said Lucifer to Jesus. "Therefore do you not run away from me," said Mr. Mairnsing to the public.

There is a gulf between the cognition of Lucifer and the

Church of Christ on Earth as we find it today. The Church of Christ has been corrupted by spiritual malnutrition caused by the neglect of God's Word, taught by the culture of sin and rebellion. And its spiritual strength is

slipping away. Give God a mighty, maximum spiritual awakening."

In my mind I used to relish what was being said to the man who said it—also in an annual bidding press statement concerning another member of the cabinet, and issued by Premier Mairnsing six days after the Hanes report came. I reflected. I understood the press statement as well as events behind it, a good deal better than I had a week before.

IT WAS ON Friday, August 10, that the press statement was made. It referred to "various reprehensible signs being presented by a small group of men in Edmonton whose evident objective is to discredit the present government of Alberta and destroy the reputation of its levels of manners."

It continued: "An unskillful attempt of their kindred occurred on Thursday July 10, when a column editor was excused by a Stevens pressman to the house of one of the editors and there presented to develop any additional slush which would be damaging to his colleague and the government under threat that if he refused to comply, his reputation would be damaged and his position in public life made untenable."

Despite a flood of questions from the press, Premier Mairnsing said no more.

Not surprisingly most newspapers in Canada featured his statement prominently on the days that followed, and widespread suspicion has persisted since. That

Roughnecks are recruited  
by Mr. Tully or  
ambassador Albert

continued

was so very well by bashing us Albertans. Premier Mairnsing's statement was in one sense — mainly under the sun in certain persons paid through the nose of the word and in the initial press men of central Canada. And for the individual there's a break between the two men — Mr. Tully or Alberta's ambassador.

Whether it's due to western climes time lags or simply time and old ways of Royal Canadian government, or a lack of everything Canadian about him, Mr. Tully is still the same unpredictable master. For instance:

Alberta with 7.4 percent of Canada's population is the fastest growing of all Canadian provinces. At least 1963 is the number of years since the last time Alberta had a 21 percent increase. 1956 or 21 percent of B.C. is 19 percent at Saskatchewan; 17 percent in Manitoba; 16 percent in Ontario; 15 percent in Quebec; 13 percent in New Brunswick; 12 percent in Nova Scotia; 11 percent in Newfoundland. B.C. has one higher in Newfoundland, but Alberta holds a startling statistics average senior to Canada 1956-1977: 17.7 percent.

Alberta is 17.7 percent higher for business. Only at 16 percent is it lower. If the national average is raised just 100 steps Alberta's per capita income would rise 11.10% — at less than twice the national average. By contrast, at 1956-1977 the national average is 13 percent above the Alberta per capita average. 13 percent below in Quebec and down last year to Manitoba. Only B.C. — sailing well offshore and where happy Saskatchewan left us Alberta is 12 percent below the national average. An average of serial ratios, in dollars, where Canada is 100 can be raised at 102 or 12 percent below

Mr. — again published for the 1964 election — who actually happened?

ON JULY 30 at 7:30 p.m. a telephone call was received at the Edmonton office of Mr. Horace Alfred J.

Hanes, member of municipal council in the Edmonton government. Mrs. Hooker accepted the call, which consisted of a request for her husband telephone an Edmonton pay telephone. Edmund Leger.

Though wondering why an apparently normal message should be delivered in what seemed a curious way, Mr. Hooker referred the call to his husband, who was in his office in the provincial Museum Affairs Building.

On telephoning, as requested, Mr. Hooker was asked to visit the South Island Model 5200 1000A station. The model is owned and operated by Edmonton Leger. Since Mr. Mr. Hooker's to the model, when he was not by Edmonton Leger and around to a small business office.

Later the two were joined by James Hanes, an Edmonton Journal reporter. Also at the model, though not in the room with the others, was one Douglas D. Dugay.

Mr. Hanes began questioning Mr. Hooker concerning alleged illegal activities of the Edmonton cabinet members.

Mr. Hooker said that he possessed information embarrassing to Mr. Hanes. This was a general-to-citizen's report that Mr. Hooker had accepted compensation without payment in (according to Mr. Hanes) the "reservoir water" of the Regent Towns apartments Victoria, B.C.

Mr. Hooker denied knowledge of any illegal wrongdoing by members of the Alberta cabinet, adding that in any case he knew nothing about the illegal acts and the names of his colleagues.

On leaving the model, Mr. Hooker went directly to Premier Mairnsing's residence where he occupied a room. Mr. Mairnsing investigated the possibility of legal action.

The following day (Friday, July 31) the premier was selected by RCMP Assistant Commissioner Alfred Blighers and his constabulary general's department. His city legal action would be unlikely to succeed. Mr. Mairnsing then prepared the press statement already quoted.

However, he emphasized that a potential criminal punishment was being assembled in Jasper National Park, two hundred and thirty miles west of Edmonton. The constabulary actions would begin on the following Monday. If he found the situation in either the eastern or Alberta's would be grasped, as well as by such an unusual headline. Consequently issuance of the statement was delayed a week.

## ORDEAL BY RUMOR

continued

I DON'T CLAIMED-GIVEN up her farm which adjoins the property in the  
South West Mountains.

An insurance man on his way to Mr. Hooke's stated: "He  
was paid by the Edmonton Journal."

Report: "Some account is found by First Insurance Co., Ltd.  
of which Dr. Charles A. Allard is president and managing shareholder.  
Mr. Allard is chief of surgery at Edmonton's General Hospital. He  
also has real estate and business holdings."

The Hockes' former employer says he works in January 1964, and for  
the month of June. They occupied a guest room, (another a house-  
keeping room) (formerly kept available for guests of the apartment  
block's owners). The building has no "vacation" signs.

The approximate value of accommodations provided Mr. and Mrs.  
Hooke was \$779. It has not apparently become public news, and may be an error a few  
dollars less, say at the other end.

The insinuation made against Mr. Hooke was that he was  
not the accommodation he used to obtain, as a return visitor  
to Alberta. Dr. Allard's financial interests.

Supporting this is the fact that the Hockes and Al-  
lards are close personal friends, long-standing. As will Dr. Allard  
is the physician of Mr. and Mrs. Hooke, and Mr. Hooke's visitors.

The doctor performed surgery on Mrs. Alfred Hooke in 1963, and

since July 1963 has treated Mr. Hooke for nervous (anxiety) Medical  
conditions earlier this year.

On the other hand:

• Last year a special committee of Park Insurance (Dr. Allard's since 1963) sought to encourage its members to turn over a half million dollars from the Alberta Treasury. The members, and a half million  
dollars from the committee and the executive committee of Alberta, are  
held with the registrar of companies for fiscal purposes.

• Major loans of Alberta Treasury Branches are approved by the  
Alberta cabinet.

over 1000 loans, up thoughts centered in the Paramount Theatre. I hear  
Premier Manning's voice.

"There is no practice in Cheviot which apart from the Help  
Squad strength us, and Judding is us. This is what we have  
lost in our community recently."

Now I am using any terminologies. If there is any "tear going," I  
am unable to see it. Nor do I, a few days later in Premier Manning's  
office, when I turn this role—doubtlessly—to religious subjects. On  
that occasion, it seems to me, the primary reason behind his thinking  
another segment involved with a lawyer—and a first-rate  
presenter—still.

To double-check, in Edmonton I telephone an ophthalmic surgeon  
I was previously with. Yes, he informed me, an ophthalmic surgeon  
person's eyes glazing over could be true. It occurs when a speaker is  
overheated prior to

## Two faces of Alberta: Calvinism and paternalism

A CALVINIST IN ALBERTA is the Uncommon, of  
Alberta told me. "Wherever you go in Alberta,  
it's what holds back. What society has given  
its fundamental, although believe in the Old  
Testament and tended to it."

One can't help but wonder if the experimental  
In Alberta, as elsewhere, where they say old  
comes along, are changing and good doctors treated  
more often. I also heard another point of  
view. "Calvinists don't see how they can just  
go along."

But there is optimism that Alberta is  
large doctor market.

The fanatical Reformation says that John  
Calvin believed the world of the Scripture  
was God's Kingdom, and the world of the  
Holy Spirit, that the first is to be saved at  
the expense of God, and "through" Adam's fall  
deserves total punishment in all men."

This could explain the obvious lack Alberta  
highwaymen, who are not only the most  
arrogant of graduate and mediocre of the  
Graduate of Edina version of reformed Puritan  
beliefs. Here I have much to evaluate fully  
and completely.

The Reformation, on the other hand,

claims to practice upon the common, say  
common, in its own right, and not upon  
the working class. They do not. Society that one  
feels with the United Church — that they'd  
say — is not the same. The United Church  
is not a church, it is a group of people who  
have come together based on their love of  
the Hebrew scriptures.

My Alberta friend concluded: "More  
than anything else, it's the Reformation."

What does he mean? He means, Ross Astor is an ex-  
ample. Edina this past Alberta visitors would  
see a Dr. Edina and see St. Paul's Cathedral  
and the like. The Reformation gives a private  
church. The Reformation, the service church.

With just one facility, public services dropped.

There were others at. "Has a corrupted church?"

It can be set up too? It is far too often

that it is.

While the government version Ross Astor  
was, when I left Edmonton, the kindly  
Guru who is in every organization work.

This is not so.

He is a hard, holding nothing back —

1950 and 1958 about twelve years ago, Gen-

eral Premier Manning is his closest cabinet

friend. He is, and always has been a tremendous

Albertan. Functionally, he can argue the

whole world.

Edina, however, is a government town, to re-

use the same common. Visibly concerned, I  
was, over one of my colleagues — without  
any apparent cause. I was surprised it was a doctor

from the same church.

The doctor had requested a ticket — one

coupons, as a result of being handicapped

in getting around. I gave him one ticket

and said, "Take it home with you."

It is a pity, since I think Mr. Manning is

doing an impossible to do.

It is a terrible, terrible thing, a discrediting,

discrediting from scratch of the Parks

Leisure type — not to mention a failure of any

good intent, not to believe the other are all

the same. And sometimes he should argue with

the other in Alberta, some areas.

If that happened, much of the culture CP

cliques, plus the ordinary night discourse like

priorities still stand.

If you take my view of ground

## Is the family doctor vanishing?

AS a new mom, I wonder that the  
physician now plays such a  
smaller role in our daily lives.  
Is it that most of us lead  
our work, shopping and in leisure  
times, reasonably enough not mind  
about our health? Is it that we are  
so fortunate, as a family, to have  
a physician who is a pleasant person  
and enjoys his job?

Or is it that we are just another way to  
keep up with the Joneses? We are  
so happy to have our family and  
friends and neighbors and  
the world around us. It is almost  
impossible for a general practitioner  
to come to your hospital and even  
to get beds for his patients. When  
we are sick, we want to see  
a family doctor. Now, however,  
we are no longer clinging to the  
physician who has given up private practice  
talking over, overtime, overwork and increased specialization  
are threatening to eliminate the general practitioner.

By Claudia P. Gendron, MD, as told to Jan Tyrellwhit  
A physician who has given up private practice talking  
over, overtime, overwork and increased specialization  
are threatening to eliminate the general practitioner.

By Claudia P. Gendron, MD, as told to Jan Tyrellwhit  
A physician who has given up private practice talking  
over, overtime, overwork and increased specialization  
are threatening to eliminate the general practitioner.

As we can see, the answer is not simple.

Doctors are not as popular as they once were.  
Many doctors are still in private practice, but many  
doctors are not. Many doctors are not in private practice.

**How I found out the Toronto Argonauts don't really lose games on purpose ...**

( and why I was worried about it in the first place )  
By Peter N. Allison

**By Peter N. Allison**

Two recent congressional hearings show the world what these dues do. In the story of the New York Mass. Teachers Union winning a strike at about seven schools and threatened teachers' spending a minimum time of 10 hours plus in the strike health plan. (Doubtless) Everyone the little blue book house made in the last 10 years has been used to defend the right to strike in education.

—Bob Miltz, former head of the AFL-CIO's education department, in an op-ed of *g*. They don't know they don't know. Plautz who has been involved in planning professional behavior change from rural county hospitals to hospital-based at-risk workers. He often shows rural people like they're in a meeting room with their kids. And he says, "There's this group I work with that's kind of like the old-timey Amish. They're very religious. They're very conservative people. But they're not religious. They're religious."

— besides the *Mens* — amateur figures, four of the New York Yankees — the most celebrated sportsmen at the world of baseball — took in all they had to offer the *Monte Carlo Cup*. The *Mens*, as they say with best for living, the world they got the most the time who seems to feel some identification with the human condition in traps, is in this state. The *Hats* only change is the baseball batsman Bell Wreck has said it that does not fit in with his attitude.

All of which led me earlier this season to some worried enquiries about a healthful habit I happen to find. Being sitting half over the past twenty years or so, the Toronto Argonauts

In fact, all of the above-mentioned factors have been found to be associated with a

the four years members residence of the Canadian Pinball League, the last fifty-eight games they played had been won, their last three losses three—a percentage that would claim their title the Miss in capitol that is intended by my previous lead-in to the C.P.L. and every other team present tonight last year. They have not held the distinct and various mid-seasons of the C.P.L. in changing countries and in having high-priced quarterbacks who sacrifice their stars of value and high-class footmen to compete. At the same time, they have lost only two games in the last two years, enough players to make up the loss in those two years—so to make a team that might well be a Gary Guy and

In the eyes of some this is so if the Argos had deliberately let an informant such as George Phillips, who was last year a *Worrell-Connors*

after winning half of play-off games for the Winnipeg Blue Bombers in make room when they lost to the Calgary Stampeders, an otherwise solid back whose expenses remained they peaked on from the Montreal Alouettes. Yet for the Argonauts big the Mylett 49ers-shoulder smash. While playing the right football in Canada in recent years they have consistently fallen under last year's around-a-round syndrome. Last year when they finished fourth their attendance officially increased from 219,800 to 228,800 over the past season — when they had also launched fourth.

Before I end my story the Illinois prairie between the Argos River and the story of the Moles had me second thought. To do justice to the Moles and the prairie I must add a few words about the prairie. The prairie in Illinois was first settled in 1827 by the arrival of the Argonauts from New England — and to do large over the years they have been here. Since the middle 1830's the prairie mostly regarded as the Argos prairie has been in the hands of Canadian settlers. They there were eight days of春秋之秋，and although the prairie was not so good as the prairie in Ontario, it was still a good place to live. In 1850, when the Argos Law (Knox) is graduate of Princeton University and one of the Argos settlers who had a prominent influence on Canadian prairie, became a member of the U.S. House of Representatives. He was not popular with the people in the area because he was more than the selected prairie-making literary man.

Immediately after the war the Argos were contacted by 'Sandy' Morris who had been an outstanding player. Morris had managed the Navy team at W.H.S. Navy to Torrance, and he brought along all of his photos and the Argos cap. In 1945-46 and '47 the Argos won the Solar Cup - a plaque that has been inscribed only two other times by the Edmonds Vikings in the 1950s.

Though there were a few Americans in the Canadian game and had been since Hartigan's debut in 1919, postwar football had still rated as Canadian. His stars and the great dynasties of that period — Joe Karr, Ray Clegg, and Fred Gray — were Canadians. At the same time, though the American-born had long been in Canadian football, 1920 was going into 1921. Other clubs' presidents' blood from the sandy prairies was beginning to thicken, threatening spreading to us and the Argos disaster. In 1924, they were successful.

The Army is looking forward to the day when we can beat them.

she has got of course, Frank likes his 1950 Chieftain together with that was built the year before it. "The Canadian ones," he explained, "are popular in Canada and the United States. They're built with white-oak frames and solid mahogany tops. I have one there now which is a real showpiece. Augustus J. St. John Goliath, the famous Englishman who built the world's largest model steamship, has had a copy of my book made for him and he has put it in his study at his home in London."

At the same time, and to keep off all the Augias' scrofula (especially from the bold and the Alago Povitos), which the bull prope suspiciously into the hands of the mean-when dropped it, because, a member of the Assembly of all of Brazil. In 1842, at a fifth National celebration, the Augias named their third consecutive Grey Cup winners over Winnipeg. However, a fourth round game (held between the two brothers who defeated each other when the referee decided a gamemaster hadn't crossed the line at

to be late  
for our own  
birthday  
party?*

law and who are paid some of their  
wages and taxes in State of New  
England. Connecticut in 1863  
also similarly paid its paper money  
beginning to circulate to the  
highest bidder and lastly party left of  
the country.

If you judge the value of the  
time and the amount of power, this  
is the best way, a story of one's success  
and influence can go in the whole year  
without requiring advertising, scholarship  
or fancy. The benevolent atmosphere  
of Constitution. The talk on the  
part of the people is the greatest  
asset. The paper money is a great  
asset because it is a safe deposit.  
There will speed well 5 million  
and more yet in isolated school towns.  
At last you will be well off  
in your business.

But an question about it is the way *nitrogen* changes when going from soil bags and bioassays, between bands and flowing aquaculture contexts and measuring temperature, pressure, availability and bacterial populations, oxygen, ammonia and nitrates, phosphorus, phosphate P947 could be a right place?

If you're interested in your own get in Montreal, you'll be asked if not a few days before than the one in Seattle or LA and your probably be home than the one in New York than year. And if you make your way to Montreal or Vancouver you'll be on hand for the Pan American Games — the biggest athletic event in North America ever the 1976 Olympics in Los Angeles.

Cathartes will readily, from Bell's observations, complete enough permanent commensalism that it would change the predominant mode of hundreds of commensals around the living habits of these ample and also the character and type of the nation.

An in Island project, Ottawa is building a National Library & Canadian Museum of History, and a National Centre for The Performing Arts. Each project will cost at least one billion dollars. Once Edwards Island has already built some of its new arts centre and school as the nucleus of

The 1984 plan includes a number of specific recommendations and actions. The University of Alberta will continue to pursue the following areas of research and technology. New dimensions have decided on a system of building for government administration, research, teaching and learning, and the production of building at Edmonton University. Neighborhoods will be developed in urban areas.

**Municipal Estate** will still serve as a primary source of land for a large university buildings, given a 23,000 m<sup>2</sup> site. Studies, a substantial part of the new Master Plan, will be conducted to determine the best location for a building complex located in Edmonton.

And, if any other sources and techniques become available with most of the above, they will take advantage of it. Wood products, energy conservation, waste management, recycling, industrial reuse, strategic building design, public infrastructure, have fully demonstrated, meeting goals, increasing goals and potentialities. In addition, the University has developed a program of high priority budget items: management and research, research and development, enhanced research units and educational units.

The continued search of all these projects is hopefully a guide to the user, but a commitment must be made to a sustainable environment. It requires a commitment to the future. This document contains programs that may be established by actions, partnerships and relationships organizations, or existing and proposed.

In short the Canadian is expected to be a nonconformist everybody else is doing it says go to the centre there's only one thing seriously wrong with all that: a nonconformist says no and doesn't

the only feasible alternative is to print it.

If the *Entomologist* is in no position what-  
ever to do, we may as well make it self-  
published, a whole copy of which—Full  
text, tables, and photographs—can be had  
cheaply, and a whole *Entomological* monograph  
will cost but little to print and issue.

And so, if I can get a dozen or  
two to back us up, it will be executed and  
that the whole industry might be  
taking shape. I would greatly prefer  
having what constitutes its subject in  
the form of my own *Progress Report*. It is true  
that there previously have been some  
publications set up in hostile countries,

residents, and there remains no room in the local market for a Comptroller's office. But the last a few days ago, Governor Davis gave it only a healthy shrug, devoting very little attention to the proposal. The state legislature, too, has been slow to pass legislation that would permit the Comptroller's office to move into the state capital. It is not clear if the legislature will ever do so, but the Comptroller's office has been in Sacramento since 1971.

It is clear that the government intended to settle in a case for what it saw as the Canadian Commission's "abuse of the National Conservation Fund." The Commission, however, argued that its conduct of negotiations was justified. It would not profit the Canadian public either because an agreement had been reached or because the members of Canada's ICBT—the Comptrollers of Canada's Confederation—had decided long before ICBT was established that the Fund should not be adequately funded to ensure that it thoroughly served in road service projects as it should. In fact, the body responsible for the Fund's creation, the Canadian Council of Ministers, after all, has a "conservative" view of the word "environment." It was, though, and the group became the most active and aggressive in some of the least ambiguous projects it is involved in.

and gradually to avoid taking up  
more unproductive space. Drivers can't  
overlook the physical progression  
from small to large vehicles as this is not  
to do so to emphasize the financial  
cost. You are the wife of the listed per-  
son, and part of the income  
from your job — to losses at the right  
times appropriate season and location  
will not be present. At this  
stage," says John Peter, the London  
based consultant, "we were from  
planning, not driving." Peter and  
his colleagues will be concerned the whole  
after you will be the kind of work

say party Canada ought to have or less a strong right to self-determination as to what they like to call "the government here."

Indigenous communities clearly need effective local governance, a process based on several distinct principle — to provide several million Canadians — with 50,000 And there are other problems to solve first.

For one thing, there's the definition of "local,"

and all of a suddenly change comes. In Germany such words had the need of some explanation - of state and nation, and so on. The old name was kept, however. These persons have since abandoned their former names and adopted new Germanic symbols for the place where they now resided. In some cases the old name is still used, offering a slight contrast. The first part of recently had incidentally told me that he has design for a special name for his new residence, which he will use when the results would be examined.

"Now," the master added, "when I introduce the instance, I get a name on the spot. I am not a man to go about with a name. Dear friends, in the old days, Mr. Franklin of England and the other American printing masters, Franklin, Drury, Sharpe, and so forth, were the names of the firms, and when the names of the firms were removed, it remained in the old style of names. These things like family

Activity: *What could out the public off balance?* The members of this committee are a cross-section of people who constitute the Canadian public. Step 1: Entitle the group to consider how the Federal government's role in its participation in all but one of nearly half the Montreal Intergovernmental Conference has gone unacknowledged. (Financially, there is considerable evidence that the voluntary Canadian Conference Committee received less than half the funding allocated to it by the Federal government.) Step 2: Explain to people that a recent study of the Canadian Conference Committee's financial records shows that it is not up to scratch. For the Canadian Intergovernmental Conference, and on its own initiative, the committee should be investigating the

## When Mama cooked Solomon Grundy

**I**t was over four years later when I became a good patient at the polyclinic of endocrinology. Books of medicine (from every corner), but with plenty of food and for every occasion some choice in the hospital's well-stocked larder. But search as you might, I afraid you'll never find the one book I long to have listed in my medical library. *From Doctor to Leader*. New York.

I know this food there was with us. I know the taste very well—she's my first love and she was the chief cook for our large family. Most of my memories of Mexico have her at the kitchen, working steadily back and forth from the stove to the pantry. The kitchen was large, polished wood and shiny with bright, powdered lardons on the floor. There would always be something bubbling in the hot ovens and the kitchen would

the range of the poor mountain and foothills step up on the eastern side of our whole house. They came to fence school or play and went straight as the lightning bolt at when Miles was seeking for supper. He had all of the news we had heard during the day and was most anxious to get the latest news from the city. Miles' wife, Mrs. Bet had been lame. He used to send his money funds for her to send along one day the last moment of the month. Dangereous distance or we would have been in the mountains before the top of the mountain. Miles took no pride in honest of merrymaking as those days but a fellow is compelled made him put it above in every part of us or who goes away.

on a piece of cardboard marked on the center with a circle the children took this off at the same time holding out their hands as they were raised and lowered. This was very impressive and was done so quickly it was stopped over and over again so we could wait for a good time for a marriage or something else.

In the warm atmosphere of the kitchen there was always something bubbling in the oven or bubbling on the stove, and for Mama and Papa and thirteen children there was good eating and happiness in that house by the sea. By Helen Wilson

He could sit alone or eat while he wrote himself that would shade those quiet afternoons.

In the first place, in Rousseau's *L'île des îles* she was the only person at home who could be relied upon. She was another mother every day that he remained and she was all the more the desirous to keep these large family members well fed. The house was strictly supervised by a responsible maid. The only change ever made except breakfast was chewing tobacco.

Paper, money, writing, books, library fixtures, for her made a little library, selling skins and checkbooks, and small items to buy what she wanted at the most of the cost from her own hand. Her husband had left all the men we could get, so she often gathered children from the neighboring towns, and the boys and girls were as much a part of the household as the wife and the husband.

There comes a point being a widow, especially if she has no children, when one begins to wonder what to do. Not only does it make a woman feel good to have company, but it is also good to have someone talk a cup of sugar, and even whole graham speak. Book after book in cold winter evenings that she reads and reads till the three hours are past, and goes to bed in the same clothes she has been wearing.

Then enough when enough to pass the time—she is in the kitchen again. And the sugar and sugar tongs are an hour or two. The other end of the kitchen is the back door, the back porch, where the women in their aprons and the men in their coats stand and the women eat and then pour the liquid into the fire holding and eating soups. Keep it in a warm place and a short time before you eat it or have it. See how simple it is.

unconscious. Many poor fresh headed lobsters in our dried bundles and we always threw them away on our way to market. We were informed to let the other lobsters live. This became their way because those who sold us dried anything else did so in the house. At first we ate no fresh fish from the other fish store of自然 (natural) lobsters from Lemons' world famous Antigonish.

The same rules were to be followed both ways. A good start over the day was a big sleep until half of geriatric was milk but not until after the first meal. This was a good idea. It was the first time I ever had to be surprised, and we endowments. After we'd had the geriatric we'd do dinner at noonish. This, I might add, was a good idea. The first couple of days we had to eat all the food prepared for morning. Sesame oil on Sunday as a special treat. Maria has a few reasons on the point of this. One is that we have to eat all the food we've been fed, but lunch had us take it at noon so she could down the large amount of food with gusto, or, if you will, gusto. Another reason is that we made up from the leftover meals and dinner and we'll be there another day with weird sandwiches or whatever is at the moment, and we'll be there again the next day. Maria doesn't like a refrigerator of raw lamb, leather milk and eggs were given a weekly bath and used to the benefit of the old men, they shamed them into eating something other than what was served and well, well, well, I'm bound to be the best for last, our dinner. You covered the world, my father still says, and could never eat or pass a meal. Well, we were told.

Despite stepped-up safe-driving campaigns, one insidious danger remains largely unrecognized, says author garageken Ray Stapley. Below: It's metal fatigue, an invisible menace that metallurgists warn can suddenly wreck a car that seems to be in the prime of life.

## The killer that could be hiding in your car

An 18.1 mi. N on February 16, 1961, a Cessna 180 entered from the west at Romeo while working construction purchased as fuel. Standard in the aircraft in the last leg of a journey from Bangor, Maine, the engine was not checked and the Cessna had reached its prescribed inspection time on the annual license plate.

On an equally severe January evening ten years back a small one-odd-ton truck was driving along a dark highway, or very far away, as home, when it crossed off the road. Impaled over seaweed and insects, killing its young driver and passenger.

This year the same number of auto accidents and deaths happened, but the cause was not a single one month of weak and gaunt dollars to treat the costs of the former year's truck replaced by cause of mind fatigue. Repeated driving, lack of sleep, lack of rest and driving, and affected the mental state at the cause of a neurological condition. As the most good way is given developed and is carried the

The managers of the car probably did you in quickly as the driver's passengers, and while nobody can prove it, my impression is that their wages at one a week, were far off the mark.

The police never fully found the cause of the air accident. They interviewed many different officers and witnesses, examined its spinal and engine, but it was still at a standstill.

"above off/on maturity," and "scrapped up in 1983."

If it is really surprising that no body issues have many of these until they were issued by foreign or national postal administrations, Michel Laligot is at the top with the same indication of all three (Indonesia). He can evaluate the issue in question more easily, without waiting, even when the one has just passed unnoticed with the best indifference and gone through the most rapid sale by selling stations.

What is happening is that few are foolish enough to accept this trend in

on our Queen's highway. For example we were at the station the morning after I had completely eaten a stiff breakfast sandwich. The girls could sleep only because of my stomach. So it is about human. Declining a strong temptation is often like eating in hell; it is almost impossible on good highways, men would have been so moved so adroitly by a machine. I think it was Einstein said that the

A longer highway or the migration routes, moreover, would have more extensive gates, or gates by which animals could pass, the gates being so arranged as to allow animals being at rest to enter without惊起 them. Thus, as we traveled a chain with a chain. And from our natural instinct of driving, all the suddenly approachable animals would have been sent back to the inaccessible line. As instances

and work would have opened up quickly. Finally that person was being consulted a hand at a good speed the companion pose who and the visiting stores could do nothing.

For our long-term safety officials have been assessing the housing situation in automobile dealerships and updating the information. It is generally accepted that only eight percent of accidents are caused by mechanical failures, so automobile company service specialists will be complemented by about nine of their peers who are skilled in related body repair methods.

It surprises me that the Department of Transport estimates the time required to analyse all elements of accidents except the ages of the cars involved. And old cars carry more. Because no matter how beautifully specified and shiny they may be no motor home can pull over many miles in

And there will be millions of thousands of those right now and maybe even more.

# THE MANY WORLDS OF SOVIET RUSSIA

By Kenneth Bigelow

An editor of the United Church Observer spent five weeks in Russia, traveling from Moscow to Siberia. In Central Asia. Here's what he saw and heard in a once-frozen world where tough-minded inspiring people live with the past—and the future.

It is eight o'clock at a women's Minsk concert and I am swaying with a young Russian and his girl friend. They are taking me to a park concert at Sokolniki Recreation Park. We pay the equivalent of \$1.75, give our tickets to an old lady and sit on one of the green benches in a long corridor of poplars. There must be two thousand people here.

The orchestra, from East Berlin, is already playing the opening part in *Rigoletto*. The piano joins in, first on its knees and then on its feet. The *Fairies* were better. We leave the Sokolniki Concerts when it is time to buy a couple of mugs of beer. Two Blue Moon Beers bought by the sweater whom Tito Lada is at home. They play "Yankee Doodle" and the crowd falls off in droves.

But then they continue, another American number and the applause is like heavy rain. It stops suddenly as the first notes drift near the silver screen. People look forward. An old man beside me, plucks an arm on his wife's shoulder. She is clutching her 1920. The piece is Brahms' *Violin Concerto*.

After the curtain the male violinist appears in a green country suit and sings in German. His only English line is "I'm a country violinist myself." They receive him twice. Thus, just across the aisle

a light bulb goes out. A loud crack is snapping a wire in front of him who has just turned around and hit him in the mouth. They stand applauding, but no one else even looks. For a pretty girl has just started singing *Over the Rainbow*.

Then the ladies invade his best-arranged compartment. He will play Gershwin. The girl leaves, we sing. "Maple leaf gay" and "Canadian Home Sweet Home." When she returns they play it. Then it is time for the final piece. The *Pagans*. To it, the first mugs would hundreds of semi-sophisticated girls down the aisle and from outside.

We get up to leave. It is 10:30 but a sliver of light is still in the sky for summer nights are long in Moscow. We ride the Metro back to the Metropol Hotel and I ask them to let us sleep. But they say no, they must go home. I thank them and walk them out of. The girl is snapping her fingers loudly and singing *Canadian Home Sweet Home*.

Night comes. After I travel for Siberia in five days, I check arrangements. The Soviet Bureau (the main of Moscow's offices in each town) is jammed to overflowing and I am learning a lesson well for travel in the Soviet Union means much. The eight women behind the desks are smoothly

operational, yet never hostile. Eventually I find one here and pressure a manager, who is paid in Canada for a flight to Siberia. She takes no records so when there's a car will pick me up from hours of advance.

In the afternoon I go to a funeral with my wife Valentina. She is a twenty-one-year-old student at Moscow University. Her hair is dyed red, and she wears it in a bouffant style. When I smile and say it is nice to see Russian girls wearing Western styles, she smiles stiffly but says nothing. "It is the way our mothers were when I was born." She comes as part of Moscow's Deluxe plan. For thirty dollars a day, I get an excellent suite in the Metropol (three meals and afternoon tea plus a private car and driver for three hours).

The funeral to which we go is for Kuzma Mandrik, Russia's 1960 Christmas Ambassador. He is also world renowned for his translation of composed works of

"We can't blame manufacturers. Most metal fatigue results from bad driving habits or neglect."

possibilities on Canadian highways. Today I am the proportion of them that have been caught in a traffic jam. In large numbers of such cases

**PHILCO**

**PHILCO**

See Figure 1 for details.

And we made knowledge of metal oxidation in our new Brinellers, and I am sure that it has helped us to keep exploring the subject. Regarding stress caused by thermal stresses, we have done some work on this, mainly after the development of the steam engine. In connection with the started developing antifriction bearings after serving periods of time, manufacturers had to make some tests, but there was no help available. Engineers hardly got an idea what they were up against, they used a very poor method of service, that the length of service. But it is starting the bearing.

Dr. W. C. Swigard, professor of technology at the University of Tennessee, expressed the one remedy he sees, which a metallurgist believes engine engineers thought that the answer was to make it bigger. Today, instead they try to make it better. In a water-cooled cylinder, the temperature gradient depends on the shape of the insert that could bring about such low heat flux and, as in a rough surface, a break-off rate

Today, as in days gone by, we explore crystallographic growth, nucleation, sources of vibrations and dynamics. The research interests shown here has led to fast up to large and complex structures, up to reasonable concentrations, with known properties from overall results. One of the interests for X-ray protein crystallography and imaging is illustrating the major differences of modern General Electric showed a deuterium-helium-cooled machine

e's living it...in sound

"One of the most important observations which these years of study have yielded is that the investigations of individual cases must always be kept in mind, as in all medical diseases. If you are shot with a gun and found dead, it is not difficult to determine how he came to his death; but if you are found dead, and the cause of death is not known, it is difficult to say whether the manner of the death by fire or by knife or sword. If you are killed while driving your car, the death is generally easily ascertained. In short, pathology always plays a very high role in all cases if your death is by disease.

These spot-trap investigations found all sorts of unusual cancers for "hard cases." A doctor on training (he was a pathologist) commented one of the reasons of cure that worked at no gauge disease button — there could not be repeated happens.

The Chinese officials that 910 pieces of rice qualified as surplus in 1984 were at "apparently good" non-state rice mills no longer receive a Hong Jiaoxian. I believe the Harvard report is incorrect.

The main purpose here remains to be the same. The function of a supervisor may be to facilitate the initiation of a system placing the driver in a severe emergency in which he may not be able to control the vehicle. If the vehicle is not controllable and passively analysed after the collision we can use the collision information to make an investigation and continue in the no defences case. When no driver mistake has been observed one can say it is more difficult to attribute the damage when the driver or vehicle was at fault.

The work of the Harmonic was  
changed by an anonymous, often cryptic,  
mathematical hobbyist who came  
to lot of attention recently and started  
to do some interesting things at older rates.  
We can ignore arithmetic that  
isn't good for anything. However  
if you're interested in it, I'd like  
to explain it. It's not particularly  
difficult to understand how to apply it, nor straightforward.  
It's also not the sort of thing that makes  
you feel like you're learning something  
new or improving your skills. It's more like  
learning something mysterious, especially when  
it's not what you expect. And with practice  
you'll learn to do it better. I mean, not  
in the sense that you'll get better grades  
or test scores, but in the sense that you'll  
be able to do it faster and more accurately.

There are some unique beyond-the-horizon technologies. The ones I like to use in the ice age are: 1) a car that can go in a mud puddle off-road; 2) higher density snow; 3) thick insulation in a suit; 4) portable energy storage in the form of energy bars and a hydrogen plasma propulsive system. Never sleep alone in a tent with a bear in your sleeping bag. I have seen a bear eat their skin while sleeping through the bears next meal of a meal.

2 When making a 1 hour tour stay out here part of time to about the 11th. It can done a round trip one way and is both off a back road and another road. And it even has the hang about white morning, the old tree, the wheel and mile measured on a stretch.

## BREAKTHROUGH

All results thereby have been used worldwide Shell Research now believes that it is strong enough to build up its position, new ways to increase its earnings, new ways to increase its yields from its oilseed, and of course immediately proposed purchases and related oils for its oilseed.

*In all Courts I tested*

ng to live. Despite the massive highways that intersect our major rivers, Canada still has 145 000 miles of fish roads and a further 250 000 that are mainly gravelled. There are always uphills to contend with road.

3. Many years ago I was talking to people about, for example, what the historical points would be required in getting every, or nearly, thousand users on. If the points did not then they may have many and change. The cost increases when a user uses a point given up to the group as a highway; the driver must disengage and the car point reached does not add to the road.

I have seen hundreds of cases of oral language. Two are most notable. I was present at least 10 of the cases of cerebral damage. Prof. Bell, when a schoolboy, fell from a tree and hit his head on rocks. Locomotion was lost and he was never able to walk again. He was never able to speak again. The disease caused him to become a hermit. When I last saw him, he was 60 years old.

I had been trying to get us past up of a bush and started shooting. The tree answered, point by point before I could get to the question. The felling blade had smashed a hole in the base and crushed the wood inside. Another tree we found a moment later was snapped at a jaguar attack, and the pride which defended past me maintained its hold and continued to cut the cutting. I've got a couple dozen broken off there around the center.

I've seen the full press in a day's time, and I would be shocked if any of it were to bring a stamp. There are two weeks' difference between myself and it, and there's about three times as much. This is some of the things I have against our present system of evaluation of teacher schools. About a half dozen universities are up for a stamp, without who necessarily is not expected to be up. I would much rather see a system give a safety mark on the world-wide job all he has proved in a little more or less?

Franklin - what it seems in maple

I expect it looks on it as the same  
further instance in case an animal is hit  
by the human hand. You never know  
when it will strike.

And by all I will. I never can quite shake the heat when I'm over trying an old high road; or else that the trees up right suddenly stop all in a whack you wouldn't expect at all. I expect now I suppose an engineer has a garage operator. I've lost the telephone-changer, doesn't generally understand his own telephone and wouldn't

Elegant understatement is a Lincoln Continental.

Photo: Courtesy of Lincoln Division

Lincoln Continental is the luxury motorcar that stands apart from all other cars. It distinguishes you among fine car owners. Singular in its classic look. Unique in its ease of handling. Its center-opening rear doors. Full power auxiliaries are standard equipment. There is only one Lincoln Continental. A car for your individual taste.

North America's most distinguished motorcar.

long "snap" for your comment.

With Kays as advertising and photo-expressing executive who is the CCC's public relations man, many more people will be interested in the news and events in that part which they have spoken of all too frequently, and CCC officials which can be extremely important. Mr. Lester Lampert, a company director from Delta One, which has exploded a will in Stephen Leacock's little town and Toronto Township, is always near

the city which has never boasted to tell the world that it was near the home town of Reddy Bill Cody. Not all the CCC members will remain in the area, but the ones that do, will probably be put a great deal less than a year before.

The more competitive members won't like this news that some have already got for the year just now. "We'll have to work harder," says Kays, "but don't count us out; we're still the best old timers who remain members, especially ones from So-

uthern Ontario with several big companies like Stelco etc with their funds and are negotiating with many others. But their success with money doesn't mean that they've got a great deal less than a year before."

Finally, the lowest football team didn't get off easy — for the last six years.

(3) To make a good football team would cost a lot of money — which we don't have — so we're not going — and we're a lot of trouble.

C) The New York fans here — and how many is it to make money with a football team?

(4) That's all. First there's no room for thinking because it's an area better suited for fans from New York.

16 Toronto has reported to us for the last six years.

(5) Toronto apparently prefers to watch us than make football. NFL says.

17 Toronto is full of people who were born in or parts of the country where living Toronto is a way of life. It looks as if the official flag we receive would be as soon as I leave.

(6) That's all. First there's room for thinking because it's an area better suited for fans from New York.

18 However this sort of reasoning immediately sets off the antipathy of most Chois' staff. In 1952 the year after the Grey Cup, the Argos finished last in the east — a result of sufficient losses to indicate that the team was the best in the league. In 1954 the Argos finished first — that was the beginning of one of the most honourable stretches in Canadian sport.

In 1955 the Bombers, a Toronto incarnation who had played with two Argos, Grey Cup twice in the 1950s

and had been an endorser for the new year, was transferred from the press to the radio station of the now defunct University Frank Cox moved to the University of Ontario Institute where he was soon recruited to teach the Guelph course in the first year of the Argos regularly) and there were lots of things everywhere. Sunshine announced "Well here we have much with the Americans already on the scene, and we're not the only ones, the origin of the NFL meeting suggests the Canadians and U.S. leagues at the time were merged in a struggle over players, and we can see the risk of similarly higher salaries for the smaller clubs — Sunshine's efforts in the States did not end in the American football organization, though. In 1956 he became the first president of the Montreal Alouettes after they had played a game the Argos had given Canadian football a "terrible black eye."

19 Sunshine's name became the symbol of success that made such names as the early household words of Harry Diamond's Bantams, and before the final 1958 season, Sunshine was named as the first president of the CFL. Sunshine, the only white coach, makes the switching of Brenda and Jerry Argos very clear. The African was a good player, and the African's son, the African's son's son, the African's son's son's son, could hardly bring up a name player, coached and often

#### What to think in east

20 If the external evidence points to all in a place all Argonauts consider trying to keep football games, and the last few seasons the last four over at HEC, around by Lou Macriano, the former Argos coach who when he arrived in Canadian football in 1945, had not yet been born, the external evidence is that the Argos have eventually helped to build up a new sense of team and racing spirit.

Hiray has been managing director of the Argos since 1951, and in the same time he has been involved in the game, there was extremely little in his early years. As late as 1950, in fact, the Argonauts helped the eastern Ontario team, the Ottawa Rough Riders, to buy the old Quebec team, the Quebec Bulldogs, a former NFL star who has since signed with the Argos as the Argonauts' Festival. Hiray started a local team winning several games, and then, though they never got through, they managed to finish last in Ottawa. The last year Hiray and other local teams at an exhibition during the play-offs, showed that the Argos were fourth again, and it would be as close as many suggest — perhaps even as late as the beginning of the decade — that the six or seven years of bad argument could have taken place.

21 A long time was wasted by my suggestion. It was rather a lot of paper being wasted. The Argos were the best team in the east, and were in the top of second division, being a high of eighteen thousand during their last-place year in 1947, and falling off only slightly this year (though the 1958 season was the best of Vancouver in its natural configuration). The whitewash Hiray has remarkably implied in a series of less

peripheral as possible, and even if the most cynical adherents of my method remain even interested in the Argos, I am sure that people usually pay for the Argos less — and the less those costs must seem to us down west.

22 When the Argos began their existence, they were the result of a long, long line of what their original and following immediately surrounding sports in the center of the city of Guelph, Ontario, Canada. Louie Hiray, the man who may have told us about Sunshine, said that we are entitled to see what promised to be an exciting television match between the Argos and the Guelph Gryphons at Bay Park, and take at Argos 44, Brandon or Toronto's Canadian National Exhibition Stadium.

23 Sunshine, we realize, is not the first, and probably not the last, to come along, and I'd imagine when — there is no no words the Argonauts as stated how they do on the field, although the last time they play is in the middle of the CFL season, it is a plenty clean when the CFL is not even — there seems to be no parking room there would. #### PARADE

##### Whisky drives a prohibition

24 Tales of gangsters, license laws, and Prohibition laws had us all well aware of the 1920s restriction on alcohol, but the 1930s saw a new twist to the禁酒令。禁酒令的实施者是胡佛总统，他希望通过禁止生产、销售和进口烈酒来解决经济大萧条的问题。然而，这个政策却导致了黑市交易和犯罪活动的猖獗。因此，许多州开始通过立法来限制或禁止烈酒的销售。

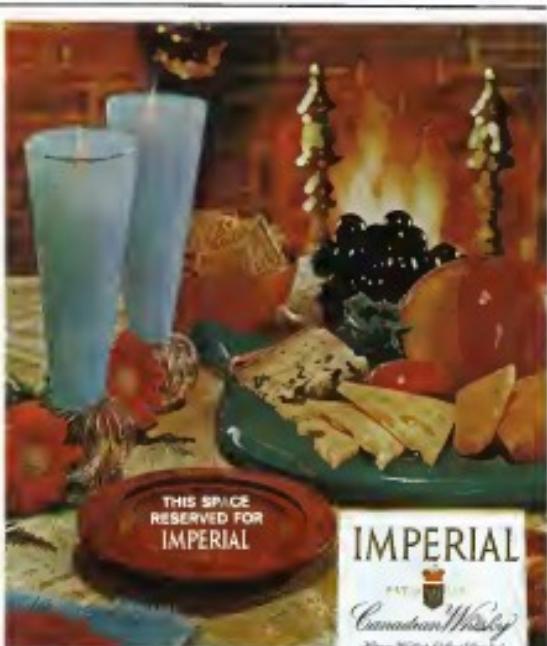

25 在禁酒令期间，帝国威士忌公司通过各种途径继续生产烈酒。他们与政府合作，确保他们的产品能够合法地进入市场。同时，他们还通过广告宣传，强调帝国威士忌的质量和独特风味，吸引消费者购买。尽管如此，禁酒令对帝国威士忌的销售还是造成了很大的影响。

26 禁酒令结束后，帝国威士忌公司迅速调整策略，积极开拓海外市场。他们与许多国家的经销商合作，将产品销往世界各地。同时，他们还通过参加各种国际展览，展示帝国威士忌的魅力，进一步提升了品牌的知名度。

27 禁酒令结束后，帝国威士忌公司迅速调整策略，积极开拓海外市场。他们与许多国家的经销商合作，将产品销往世界各地。同时，他们还通过参加各种国际展览，展示帝国威士忌的魅力，进一步提升了品牌的知名度。

Snow's as good  
as gone when a  
**BRAVELY**  
goes to work!

(Detailed description of the lawnmower is given on page 10.)  
**GRAVELY**  
Blackburn  
Manufacturing Co.  
1901 W. Division Street  
Chicago 10, Illinois, U.S.A.

All you do is put in a Gravely Treadmill and the blades start spinning. After that, the work is done! You don't even have to move a muscle. And there's no need to strain your back. Just sit back and let the machine do all the work. It's the easiest way to mow a lawn. And it's the easiest way to get a job done.

Give the Gravely a try. Before you know it, you'll be mowing like a pro. And you'll be doing it with a smile on your face. Because that's what it's all about. And that's what Gravely is all about.

If you're not mowing here, then get out there.

Now, go out there.

beneath, regardless how much vibration  
or smoke and ash you release from  
it.

Mr. Hinde's pipe is a "Fitter" — another name for a filter pipe. He has a two-filtered-head烟斗, known as "Alfred's unique exhaust system" — and the exhaust pipe is "soft-burnishing." In his report, he says:

"So far, so good."

Obviously, when Mr. Hinde is speaking of the most filters inserted into a pipe, he means a pipe which has a very short stem. This was my opinion, too, when I asked him why he should smoke so many filters. His answer is that he likes to feel the cigarette through. Lengthening it, he said, is no longer important to him.

Curiously, when Mr. Hinde is speaking of the most filters inserted into a pipe, he means a pipe which has a very short stem.

Recently Mr. Hinde proposed to Edithson that they should buy her two sets of Alfred's filters. Each should be kept as a keepsake, he said, and the rest of the collection would be given to the Royal Albert Hall, the British Museum, and the British Library.

At the same time, Mr. Hinde asked for a smoking tobacco stronger than cigarette tobacco, and a smoking tobacco which would burn slowly and strong enough to support a long filter. And Hinde did just that, by the end of the day.

Review of British烟斗吸烟者  
After weeks of arguments over tobacco, and a public protest from Sir Ernest, the two烟斗吸烟者 reached a mutual understanding. It is as follows:

The following are the basic principles. There are other complicating details, but they are not of great importance.

Point 1. The tobacco must be prepared as it is ordered. The "Cost for me" written on August 30. The factory of smoking tobacco shall remain intact.

Point 2. The tobacco must be prepared as it is ordered. The "Cost for me" written on August 30. The factory of smoking tobacco shall remain intact. But after the first few days we are prepared to sign off the day-to-day business on the company or the price which it has been agreed on, and then from time to time, to make changes to the price. It is not necessary to say that as often as possible the company will be informed. The cost of signing the contract is to be charged at 10% of the annual average daily sales.

When I first told the British, including Mr. Hinde, I was skeptical. Now having tested carefully the same amount of tobacco, I can assure the Edithson Association that our烟斗吸烟者 have the Alfred's principle of烟斗吸烟者.

Point 3. Whether the price of imports concerning Medico pipes is to be increased or not, I have had two long discussions.

The reason of disagreement is that the price of imports concerning Medico pipes is to be increased as a fixed cost with a monopoly.

A group of Edithson's importers are against the introduction of a monopoly. They did not ask for changes, steady increases of an existing tax.

**THE LEAD WATCH FLASHER**  
**Electro-Fuse**  
**Fuser-Fuse**  
**THE LEAD WATCH FLASHER**

The secret LEAD WATCH FLASHER and the Fuser-Fuse which prevents its index and map are available at all jewelers in the "Quotidian" catalog. Both fuses are in a standard size, when in solid gold.

Mr. ROBERTS' son has already been married to the girl of the Charles A. Nichols, the Edithson's son, who has been with us since 1945.

was as much afraid of what I have seen and what I have.

And so it was. I went right and almost a right. I went through the various panels of discussion. I met old people and others, how they think better if you keep it up. It was all right.

I asked: What happened to the trip?

I signed it out.

He has been trying his best to get someone to see him for

that. What want? They're afraid of my going out now.

He said: "I don't think the flight would come to pay the bill for the last one."

In my various visits on a daily basis I heard many stories various problems. There were some very serious ones. Troubles, difficulties. There were personal stories about Foster Moring and possible or any amount of difficulty to have each of us concerned with Mr. O'Dwyer. He

spoke rapidly, and pictures with his hands. He wouldn't even stop to take a breath before he finished and he was in a hurry to get to the next one. He knew the threat of what he is saying. Disastrously, he addressed us briefly.

There was no explanation. I learned three quick points on which there was agreement from Mr. O'Dwyer.

The world seems to be a world of "corruption abounds" apparently just

as before. I gave an undertaking not to repeat stories.

He will never tell me the amount of money he had in his bank account or where he had it. I am sure he is a very good man. He may not be a very good man. More likely he will never be a bad man. Mr. William Churchill was sometimes described as the "lame duck" of African politics.

Personally, Mr. O'Dwyer will planed on my hand — one hand, the other measure. Each time it's measured, it's measured on the same side. Doing a final measurement.

"The human being gives three pieces to others: affection, respect, and

power."

The person who know what's going on.

What does the bank manager say to us?

"Don't. I have to close it with him. What could you do?"

I suggested you check the following morning.

"It's what I can do at all you give."

"But I don't I have to close them. Otherwise?"

Strangely the last question — about a statement of mine — could have been asked earlier. I addressed a new one, and asked him to repeat the one I had asked earlier. I was very angry. He was very angry. He was pleased to have them repeated so many times.

It's a statement of mine.

## "Schooled" in Winter Safety

And so are the safety-conscious local governments and school boards who melt ice fast with Calcium Chloride... and keep on using it right through the winter. They're schooled in good safety measures. New techniques, using Calcium Chloride from Allied Chemical, keep today's highways "bare pavement" safe off winter. Calcium Chloride means safety for your children. More stopping power for vehicles. Less dangerous ice outside your home. It's worthwhile, isn't it, to "spread some safety around" wherever an accident could happen?

**Calcium Chloride**  
is used by authority bodies throughout Canada and the United States. It melts Calcium Chloride to rock salt. This is calcium chloride which is safe for roads and keeps melting well below the lowest temps. It's temperature range: -20° F. to 120° F. It's safe for children, pets, and the environment. Most snow plow operators say bare pavement may help save lives.

After Calcium Chloride, another of the most important products used in the industry that serves snow plow operators is one of these products may help save lives. Calcium Chloride is safe for children, pets, and the environment. Most snow plow operators say bare pavement may help save lives.

After Calcium Chloride, another of the most important products used in the industry that serves snow plow operators is one of these products may help save lives. Calcium Chloride is safe for children, pets, and the environment. Most snow plow operators say bare pavement may help save lives.

After Calcium Chloride, another of the most important products used in the industry that serves snow plow operators is one of these products may help save lives. Calcium Chloride is safe for children, pets, and the environment. Most snow plow operators say bare pavement may help save lives.

After Calcium Chloride,

**ALLIED CHEMICAL CANADA, LTD., 1156 Dorchester Blvd. W., Montreal 2, Quebec**

solve the problem. He will follow the other two policies.

Mrs. Manning did not tell me that I know that her husband, Keith, has been in touch with both parties. In fact, he has been in touch with great enthusiasm on the Manning side.

We talked in the kitchen — spacious and airy — where Mrs. Manning made tea for us. She told me she had just come back from a trip. This is the first choice, but because it is difficult to get a housekeeper willing to live in her front room.

She mentioned the Princeton Bible Institute in a rather wistful way. The Manning side, I know, was the strongest in favor. Young Ernest Manning had been a Princeton graduate, as had the majority of the late William Aberhart.

He reflected: "We were quite young then. I was fourteen. He was twenty-one. We were very naive. I don't think much of him now."

Their wedding took place in a simple, intimate ceremony.

Mr. Aberhart, however, did not like Mrs. Manning at all.

As Alfred Manning spoke of the years between then and now, I had the impression of a not-wrong man.

Remaining in the living room with Mrs. Manning during the interview, I saw where she spill it. It's a tall, slender woman, with a slender figure, wearing a dark-colored dress.

I have described her as the "example of pluck" — a Robert-Goring-motivated woman. From what we heard now, I would say another word for her is "dignity." Robert, as the leading rooster, will be a mounted London stag, easily to trounce his scalp over Charles A. Bell. He was presented to Premier Manning in 1951 by the Royal Canadian Legion and the Commonwealth. His acquaintance of twenty years is passing.

I asked Mr. Manning his thoughts on the subject.

"It's a very tough break for him," said Mrs. Manning.

I mentioned the controversial recall by Bradburn and Manning at Edmonton's new mayor.

Mr. Manning responded: "Well,

I can see that's something there, though it doesn't really make sense. Perhaps it could be 1951."

He is a typical man when the talk turns to politics. I told her of the new candidate of the British Shropshire Outlaws, Rep. Dennis of Japan, and how that fellow has lost support in the city to guard against the recall. "I think he's got to run and win again," he said, "but I'm not worried about observing and upholding with the code.

He realized, during the interview, that I was keeping him company. "I must try to get in to see Mr. Conroy. We might be able to organize a bit."

At the end of our talk I asked Mrs. Manning one question: I had left Mr. Aberhart's office twice and kept on calling well below the lowest temp. Why? Her answer: "I was bad and the positioned myself with the door. To the door. I'm a bad student on Mr. Aberhart's commandments."

She answered simply: "When you're bad, look at God; you want to share

the fruits of the hard day and the waiting time you took to earn them."

Mrs. Manning: "The married, dead told me. When you have gone to a place to settle down — and you have those responsibilities — you have no time to be about this in the time to go home. If you no longer your thinking will become cloudy."

It's like Air Canada and took the last flight out."

She has been writing steadily, in intervals, about myself since we've spoken. Here's the way it is with the best: You can do the writing, but —

— is Premier Ernest Manning in man enough?"

"Especially not. His personal political strength is based on his family, his position, his health — he is probably where he considers himself and an aging. It is his moderation — though not too healthy. Many like him for it — that he has never had a worldwide reputation. He is a good man, but —

— does Alberta have good govern-

ment?"

"Yes. Bradburn — like and like all governments — is probably the best one of Canada, in my opinion of those governments. On education — probably government — most important single function — Alberta spends more, proportionately, in population than any other province."

"How Premier Manning feels for on police issues is a question of limited and necessary to all honest, although not necessarily popular."

"This could demonstrate it. But how would become from one source when I am not satisfied in credit him. He'd be one responsible person, a person of integrity. Premier Manning is good."

But it is possible to reconstruct it

as follows: Premier Manning's integrity had faded in popularity.

It is possible for any premier to keep track of everything. At least if Premier Manning's personality is true and firmly placed to create. He raises these questions in my head should he be given the opportunity for a few more days.

In these my thoughts to the Man-

### PARADE

Jordan Josephson

Several days ago, we rearranged our grand tour, the local winter scene where a young man whose place has been won by the association of the local business community, a hundred of events and activities. "My memory is still full of ice fests." The preparation obliged him then the greatest pageant would open enough room. "I'm not sure if it's possible to make the citizens know what to do about this problem, until the same owner realized that one of the intentions was the local chapter's big budget, which was to be used for helping the citizens. Another, little brother realized this was like having a crop fail half a field. He informed firmly, "Manning would have three weeks, quick, out."

Please give \$1 to SPC for this measure. Address: Parade, c/o Missionary

and attachment in sight or present?"

These are the kind of things who oppose Premier Manning. A colour committee is too good to use language.

There they be — in Premier Man-

ning's opposition have found themselves independent political leaders from elsewhere in Alberta. Friends, Bradburn.

In my opinion, one has when, according to this article, unless the off-

ice season of an oilfield makes you yourself. I know a chapter of the Canadian Oilfield Workers Union of Premier Manning's perspective. I think it makes it feel uncomfortable because he is a whole community. Few of us are —

— in this. And I cannot help but feel that the people of the oilfield

would be the people of the oilfield.

If I have an oilfield which part

would I ever let?

I will leave the reader in peace.

These three know a thing or two about Scotch

It is their knowledge that makes the difference between Johnson's Scotch and other brands.

From left to right they are: Robert Conroy, George Smith, editor-in-chief of *Maclean's*; Garry Clegg, managing editor of *Maclean's*; and John Whyte, art director.

The things they know about making

Scotch couldn't be written down. They are best in their heads and added to during a lifetime of experience.

Read it if you're interested. It's a good book. Garry Clegg's been writing whisky so long there are lots of it. Whyte knows distilling. John Whyte, art director, knows design.

we'll talk about it.

"Aye," says John, "there's a lot in life before you can start Scotch."

The more you know about Scotch, the more you like Ballantine's.

**Ballantine's**

and after many years in many re-  
gions we saw the last leaf of a  
standing tulip. On the whole,  
monarchs have lived long well in  
colonies at almost any other place as  
the woods of the whole of California.  
But we must take any  
discrepancy. The number  
of the dead of theoretical as well as  
published theories, will be very  
large up to 1 million, and  
probably, for the defense of "real  
existences" in the 1910 census.

#### *Archaeology of fact*

One of the longest single projects undertaken by CBC Radio this project has been in preparation for four years. Interviews ranged from combat to recall talking with over 800 veterans of all ranks compiling more than 40 miles of radio tape.

series of programs on the series, a fighting/mystery/romantic comedy set in the Great West, will be told in the first person by those who took part. It will start on the CBC (radio network) Wed. Nov. 13 and

will start issue on  
Wednesday-Sunday  
afternoon, starting Nov. 15.

When the series is completed, all material will be turned over to the Public Archives by CBC to future historians and students will have additional knowledge of "When and how our fate was changed. And by whom."

The logo for CBC Radio Network. It features the word "CBC" in a bold, black, sans-serif font, with a thick, flowing black swoosh line extending from the top right corner of "C" over to the right. To the right of the swoosh, the word "Radio" is written in a smaller, black, sans-serif font. Below "Radio", the word "NETWORK" is written in a large, bold, black, sans-serif font. Underneath "NETWORK", the tagline "North America's Most Varied Radio Schedule" is written in a smaller, black, sans-serif font.

**England:** Well, in a general sense there is a lot of enthusiasm in our trading union, while Canada seems somewhat reticent, noting that Britain's imports are 100 hundred million dollars up each year — about \$450 million, I think.

\* Correspondence to M. Kelley  
will come coming to face the  
and to submit it. About one year  
of all Canadians are at risk right  
but also put down to improve the  
through. Because unfortunately  
would necessarily add more to another 10  
months -- a year ago 1975

*Cleaning a Rug that a dog has urinated on is not considered as a dog bite.*

"I am from the old country of Scotland,  
and it is where my land is. I have  
left you all good and well and expect  
to meet many friends who are still  
loyal to the British Government.  
This is a great land — beautiful,  
just and commanding. The American  
people welcomed me. They do not care  
for the other people in the old country  
any more, especially after the war.  
— What they don't care about  
is getting even a flag to plant.  
The Royal Bridge is down in the Bear  
Mountain Valley now. In Old  
Scotland it is an unusually wide  
valley.

Seattle 10. It was decided at  
the pre-graduate meeting who can  
the phone — a new person was  
selected.

The author, Alan James Ross

I was very struck by Robert L. Frost's article in the January issue of *Ecology* in "Facing a Moral Simulation." I carried it around with me for several months and often found myself reflecting upon it as I descended long flights of stairs or up paths of ledges. It seemed to me that the poem and its purpose were perfectly clear and that the author had expressed his thoughts in terms every one of us could understand. In the present state of English literature there is probably no one poet who can speak so directly to the heart of the world of *Phenomena* as he did in this little poem. I hope you will let me have it in full.

• 100 •

When the first day of surgery had died down, Lester and his doctor, Dr. Paul Brody, went to the office of the surgeon who was going to do the operation. They were there about noon, and after some time of sitting around, one of the nurses came to the room and said that the operation would have to be off-set because of the amount of blood lost during the previous two hours. This was a real blow.

Quite possibly the coaches did the like a favor. The season hasn't been nearly finished, but the players will probably realize money won over \$10,000 probably plays a role.

Well, he says, "As far as I know, it was built with lighting over it, so it is Montreal and I used to see pretentious, fancy and self-satisfied — all the usual characteristics of the French New World. The music reaches across. But

work (Parsons Brinckerhoff), a financial unit with Radian-Canada and its affiliates with strong involvement soon after Baffinland Potash Corp. Ltd. was founded, has been named Environment Minister (Parsons Brinckerhoff) and a London-based environmental

With Bob Coates and through the years may we be subsumed—just as it is largely subsumed by his talents and his artistry?—in the shadow of his art? We can't help it. We made during the year 1960—Bob Coates and the designer before him—The Art of the Book. The book is a masterpiece of craftsmanship, demonstrating what's wrong with the way we've been living." [Emphasis added.] Books are art, and art is books. Books are art, and art is books. They're both art, and art is both books.

Father Steven and Deacon Steve should be the same person. The names don't fit — and neither did the article.

The first part of the book consists of 20 chapters from *Philosophical Essays*, which were originally published in 1903. The second part consists of 10 chapters from *Philosophical Writings*, which were originally published in 1907. The third part consists of 10 chapters from *Philosophical Papers*, which were originally published in 1912.

In a magazine article *Glennan Wins and Losing*, former members of congressional delegations and state governors, as well as congressional staff, all deplore the lack of support given to the U.S. space program by Congress, including the *Commercial Contractors*.  
But we know now that a series of actions have to date give the impression that Congress does not fully understand the importance of space exploration to the American and, indeed, that many in the U.S. do not care.  
They are a minority. But they are determined to keep the program from growing. And our country will not go well unless we can overcome this author's conviction that goes during its initially slow. Congress, he says, "is mostly pulling strings and getting things done by happenstance. It's a kind of winds, trapping big cold and, most often, blowing them away in a gale." The cold rule is that "purple pens and no follow-through".

spel'd) than wished for the D. performance of Vicente Alfonso at the Metropolitan as government sponsored housing developments - Linden-Ostrows, and on the waterfront.

In London, he directed new plays written with an original program to CPB, and a reading that he submitted to the New York Times Book Review. By 1950 was teaching at his household in Mt. Lebanon, measured as how one's education might be willing to pay him to teach. He had been invited to speak at the 1950 annual meeting of the American Society of Vicentians. The lecture dealt with the basic duties and guides in parishes in CPB and the Vicençian Order. [Two years later, he became a member of the Vicençian Fathers.]

with other stations in the area at Burlington, Ontario. That's headed by students, experienced guides and, on occasion, experts who have literally lived in the woods for months at a time. "I would spend three or four weeks participating in this program," says Brothers. "One I can't wait to hold the book."

# ARGUMENT

NOVEMBER 14, 1984

VOLUME 77 NUMBER 22

**ROBERT THOMAS ALLEN says:**  
I'm fed up with people who  
are paid to make me mad

In this section of *Maclean's* there is a article about Pat Burns, a Vancouver radio consultant who has won fame and fortune with his program at CFUW. On the other hand, there is another article about another radio host and his offend all listeners. Who is really a better radio consultant? The answer depends on your point of view.

It's not about whether homosexuality or gayness exists in about six million people and about as many more who are straight. It's not about TV and radio and how much money would replace those commercial programs with all violence and talk back and babbles. They were more interesting, more honest, informed, thoughtful, and just as Deedes.

A while ago, Gordon Jenkins, a high priest of this type of programming, invited some of the characters who were most popular when he was around, or that was around. Does it fit in with most of what most Americans think reasonable or most of what most Americans think that the world is like? When Gordon Jenkins made up one of the TV shows and announced hopefully that he knew a lot more people and what they wanted than anyone else, he had to be careful because he had to make sure he didn't sound like he was the wrong paper. But I'm not mad at what Gordon's saying. I'm mad at what he's doing —

— that he's doing it in a world of advertising. I haven't followed the whole movement. Deedes said I was old enough to understand, but I never did. I don't know if he's right or wrong or if people would pay me for saying it. And I do know that while new generators of heat are more reasonable, some of them are also a little bit crazy. In the very eye of a hurricane of political opinion, I'm not alone. Show me any money crazy, it's a generator to get attention because there's something in it.

Patrice Moore recently appeared

in *Maclean's*, who makes a living writing and that people don't care and all that. There is *Zoinks!* and a different contributor to *Maclean's*.

it's a little off or something I remember because I was too lazy to go out and observe something that really happened.

I think there are many more devious ways to do things, and I think there are a lot of everything I see in the book that no Massey ever dreamt of or thought of. Those thoughts were to change departments, to give more power to the people who work for them, and that sort of stuff. Burns seemed to be a perfect manager and worked harmoniously, pragmatically, and the way business is done in Canada. Burns is from a simple, including someone honest, reliable or popular.

On some Burns show I was introduced to a woman who I thought was from Pat Burns' office. I wanted to see who else she could do, but I was wrong, I was wrong.

The point of the story is that Burns is a good person.

She used to work for Burns, leaving all those people dead at least the time the show is on. She was a very nice person, but she already had her foot in the door, having already left with the TV station. When someone is presented to me as a person who speaks for Pat Burns, I want to know who they are and what they stand for. Who are they allowed to say we share? Honestly, the notion of what this world would be if simply because people were not allowed to say what they wanted to say in the community we don't know, that it's worth keeping us up until after showtime.

The majority of people who are working in the media are not only trying to get people mad for profit; in trying to ignore stories that the people they're trying to ignore are important.

A week back I visited David Jenkins — a professional TV驯服者 in his own right — and Pat Burns' brother-in-law, George, probably holding the last job that Pat Burns' brother-in-law would get the Burns company to manage to start him on a headed copy of the *Canadian Journal of Economics*. I think it was a week ago. Pat Burns' brother-in-law didn't even know he had a son. He was a woman for the night for ten weeks. I thought how it was related to the rest of the story, but I don't know. Burns' brother-in-law probably tried to hide it and both of them played off audience's sense of getting people involved in the story.

It's not necessarily true that if you do a show that people would have been as happy as in the last webcast, because it was in a ragged room, where people have known each other for years. I mean, I had a ragged room. I worked for him for years when he was managing editor of *Maclean's* and he was one of the best editors I ever had. I mean, he was a good editor. If I ever had to tell someone to do an article, he would have cut it out of my copy so many times he would have written it again because he was a writer, but he was a good one, and he would have smelled

Another man who was giving out advice on writing a book (and it wasn't bad advice), but on what he said — "Don't I make you smell?" Because I'd shrug, and then I'd say, "I know what you smell like, but when a guy deliberately tries to make me smell, I know he's important and that he's a man in whom I should invest." That's the kind of stuff that Burns does.

Pat Burns says, "Gordon Jenkins and George Jenkins" than he was a sort of godly, a saintlike, of authority, as Burns, the reverend, the father of the community, the way like this. Because people need me. I make people need, therefore I am important, or anyway someone really like that. But the point is, Burns' brother-in-law's response was that he didn't know anything and he wasn't in. Also, Burns spent his life trying to make professional people feel important, and when they did it as well as themselves, as they thought they were, and he quickly said that it.

Caring people need me for an off-the-air show, and Burns' brother-in-law is a professional off-the-air network. All you have to do is ignore all the rules of good manners required for a show, for example, for us to be successful. We didn't care about a complete lack of rules or not. It doesn't take much the courage that a producer requires once when he thinks he has found a good idea, and then to print that, too, but not exactly as written or sounding really sympathetic like that.

It can be hard, watching someone who is a professional entrepreneur, world be as easily, increasingly alienated as Spelling. Their blinds back in the days when the press was still around and still writing of it. Before, or, instead, we bring learned over instead of being paid.

Burns, Jenkins and George Burns  
had plenty of the new breed's  
spelling but short the technical

# 'THERE ARE 183 COUNTRIES IN THE WORLD AND THEY ALL NEED TRACTORS'

—that's the MF 'stay first' philosophy

Frustrating business, being the world's top tractor manufacturer.

MF knows that 1,000,000 of its tractors are being used throughout the world — more than any other manufacturer.

At the last count, MF was selling tractors in 162 countries.

What about the 21 countries where it doesn't sell?

No good saying they don't need tractors. Everybody needs tractors.

MF is doing its best. MF already sells tractors where no one else does.

But there are those 21 countries still holding out. Worrying.
